

# Share Market Starter Kit

With our **Fast Track to Share Market Success Starter Kit** discover how you can start investing & profiting from the Stock Market almost immediately! Even if you have not invested in shares before, or you are a seasoned investor who is extremely time poor...

Our solution was built from our belief that creating wealth is about working smarter & that share investing does not need to be time consuming or complicated. With this in mind we created a simplified non-jargon Stock Report subscription service where we have eliminated the unnecessary 'fluff' from market reports to avoid subscriber confusion and time wasting.

We also understand most people do not know where to begin and can quickly become overwhelmed when starting out in the share market. So, to complement our Stock Report, and give investors a boost from our market experience, we hand picked a selection of essential tools then teamed up with some industry experts to create the **Fast Track to Share Market Success Starter Kit** designed to launch investors quickly and easily into a competent position where they can make consistent returns, safely from quality blue chip shares.

*"Most successful traders wont share their secrets with anyone. Unearthed has given me the opportunity to place the exact same trades as the professionals, with the most consistent & profitable trading plan I have seen yet!"*  
C.Betts, CEO, Financial Freedom Pty Ltd

## Your FREE copies of our Stock Reports will Reveal:

- ◆ How we remove all the guesswork and instruct you exactly when & what shares to buy, sell & hold;
  - ◆ How you can profit from both rising and falling markets;
  - ◆ The exact price to exit non-performing stocks;
  - ◆ Market information in a simplistic, concise, non-jargon format that is easy to understand and implement;
  - ◆ How frequent trading isn't necessarily more profitable, our average trade length for blue chip shares is 18 months;
  - ◆ Recommendations for Blue Chip Shares and World Indices, suitable for Shares, CFDs and Futures;
  - ◆ How our proven strategies have previously returned a consistent result of 25-35% pa.
